THE WORLDS FINEST GUITARS

Vihuela • 1555

During recent years the Classic Guitar has reached a popularity as never before and the demand for instruments of the highest quality has also risen enormously. We are proud to present in this catalogue the complete line of GOYA Classic Guitars, all models built in accordance with the latest acoustical findings. Each instrument undoubtedly represents, in each price classification, the finest Classic Guitar ever produced with this tone, workmanship and artistic beauty of design.

Only the very finest selected woods such as the flamed maple, beautifully figured walnut and rich mahogany are used. In order to get the delicate and rich tones necessary these specially aged and seasoned woods are used exclusively. Each style Classic Guitar Neck is made of mahogany and reinforced with a T-rod made of strongest duraluminum. Upon examination of the GOYA Guitar one will marvel at the beautiful glass-like hand rubbed finish. The talent and creative ability of generations of craftsmen have gone into the design and creation of the GOYA Classic Guitar.

These fine expressions of old-world musical genius and dexterity are all fashioned by hand, through the facilities of the shop and personnel of A.-B. Herman Carlson in Gothenburg, Sweden. Each and every instrument, before it is delivered to our authorized distributors, is carefully adjusted, tested and approved by personally appointed Classic Guitar specialists.

"The guitar," said Berlioz, "is a miniature orchestra." The truth of this statement is apparent to anyone who has heard a competent performer play the works of the great masters on the instrument: its harmonic and polyphonic richness, its clear, singing treble supported by deep and sonorous basses, its variety of tone color, all contribute to make it a completely worthy member of the family of instruments.

The guitar has a long and honorable history. Its origins are lost in the remote past, but its popularity, although it has waxed and waned over the centuries, has endured to reach new heights today. With its near cousin, the lute, it was the favorite instrument of the Renaissance; the first published music was for the guitar or vihuela, as the early Spanish guitar was called. These instruments retained their place of eminence until well into the eighteenth century. By this time the more ponderous and complex, and thus more versatile, harpsichord and piano swept their fretted and plucked predecessors out of their formerly uncontested popularity. Strings struck by hammers replaced strings plucked by the fingers; the machine was replacing man. Even today, however, there exists more music written for the guitar and lute than for any other instrument except the piano.

The composers who wrote all or most of their music for the guitar and lute are legion. Although less known than those for other instruments more in vogue, some brief mention may help acquaint the reader with them. Among the early Spanish masters, such names as Luis Milán, Enríquez de Valderrábano, Esteban Daza, Miguel de Fuenllana, Diego Pisador, Luis de Narváez and Alonso Mudarra deserve to be known. In Italy, Vincenzo Galilei, the father of the astronomer Galileo Galilei, is among the great composers for the lute; with him may be mentioned Simone Molinari. The English lute school is perhaps the most famous, with such names as John Dowland and Thomas Campion, a poet as well as a musician. Among the French, Pierre Attaignant and Adrien Le Roy were the direct precursors of the French clavecinist school. Among the many Central Europeans who wrote for the lute, two in the eighteenth century may be mentioned: Count Johann Anton Logy, an Austrian, and the German Sylvius Leopold Weiss, who probably influenced Johann Sebastian Bach to write his six suites and other pieces for the lute.

Besides Bach, both Handel and Vivaldi wrote for the lute; when that instrument fell into disuse, Boccherini was among those who carried on the tradition by writing for the guitar. Berlioz himself, Schubert, von Weber and Paganini are some of the other great composers who distinguished themselves by writing for the guitar. Wagner, paraphrasing Berlioz, called the orchestra a "great guitar"; Debussy characterized it as "a harpsichord—but an expressive one"; Manuel de Falla, who wrote his *Hommage to Debussy* for the guitar said of it that it was "the instrument most complete in its harmonic and polyphonic possibili-

ties." Among contemporary composers who have devoted themselves to works for the guitar may be mentioned Villa-Lobos, Castelnuovo-Tedesco, Tansmann, Turina, Ponce, Torroba, and Roussel.

The poet Shelley played the guitar and wrote poems in its praise; the painter Goya listed it as one of his necessities of life; the greatest monarch of his time, Louis the Fourteenth of France, was an able guitarist.

The guitar reached a high point in the nineteenth century, following the success of the guitar composers Gaspar Sanz, Robert de Visée, and Francesco Corbetta in the seventeenth century, and François Campion and Fernando Fernandiere in the eighteenth. Fernando Sor (1778-1839) is generally recognized as the greatest composer to dedicate himself primarily to the instrument. He was followed by Dionisio Aguado, Mauro Giuliani, Matteo Carcassi, and Luigi Legnani, who was associated with Paganini. Wenzel Matiegka, a Bohemian and close friend of Schubert, and Anton Diabelli, whose relations with Beethoven are well known, were also guitar composers of note. It was again a Spaniard, Francisco Tárrega, who developed a modern technique of guitar playing. In this he was aided by Francisco de Torres, who created what is today the standard classic guitar.

The classic guitar of today preserves the characteristic shape of the figure eight of its predecessors, but is somewhat larger and wider. Its wider fingerboard (approximately two inches in width) accommodates the strings without crowding or hampering the fingers in any way; there are twelve frets (or one octave) between the body of the instrument and its head, and six or seven over the soundboard. The strings are attached to a flat bridge glued directly to the soundboard of the instrument, rather than passing over a bridge, as is the case with the violin, or being held by pegs which go through the bridge into the top of the instrument, as was the earlier practice. The whole instrument is made of the choicest seasoned woods, selected for resonance and strength; it is tastefully decorated with an inlay around the circular sound-hole, and sometimes on other parts of the instrument. A classic guitar is never *painted*, as are many so-called guitars which one sees today, but is varnished to preserve and decorate it. The interior construction is characterized by a fan-shaped system of bracing under the soundboard, to give it maximum strength and vibrational elasticity.

The classic guitar, unlike most instruments, produces its sounds by the direct contact of the fingers, whence the suavity of the sound which it gives. The pitch of the notes is determined by the position of the left hand fingers on the strings, as with the violin and 'cello; thus ligatures, slides, trills, and other such effects can be produced with ease and brilliance. Its range is from E two octaves below middle C to B an octave and a seventh above middle C; it is thus not only distinguished by its deep basses, but also by a considerable treble range. It is capable of realizing full harmonies, and chords of up to six notes.

Thousands have flocked to the concerts of eminent guitarists since the beginning of the last century, and more especially since the turn of this one. The disciples of Tárrega, Miguel Llobet and Emilio Pujol, have received world-wide acclaim. Today there is hardly a music lover to whom the name of Andrés Segovia is unknown; his many concerts and recordings have done much to acquaint the public with the capabilities of the instrument. Also known all over the globe are the brilliant guitarists Rey de la Torre, Ida Presti, Maria Luisa Añido, Julian Bream, and many others.

Encouraged by such organizations as the Society of the Classic Guitar in New York*, and its outstanding publication the "Guitar Review", people in all walks of life are turning more and more to the guitar for the relaxation so badly needed in our modern world, and for the satisfaction that can only be attained by the performance of good music on an instrument that, besides being full and rich musically, has the added practical virtues of being portable and inexpensive. This is not the harsh, metallic instrument of our "cowboy" singers, but a sweet and pure creation of master craftsmen, strung with the new nylon strings, and designed to give expression to great music to the taste of the most delicate ear and the satisfaction of the most sensitive temperament.

*Our sincere thanks and acknowledgement go to the Society of the Classic Guitar, 409 E. 50th St., New York 22, for their coöperation in supplying the information and data contained herein, and especially to Mr. Vladimir Bobri, its president.

Rizzio Guitar • Scotland,

Guitar by Antonius Stradivarius, ca. 1680

OSCAR BRAND
 WORLD FAMOUS
 FOLK MUSIC AUTHORITY

One day I was standing in the middle of a large guitar factory in Gothenberg, Sweden, and the chief artisan asked me, "Why do you need a special guitar for folk music?". I explained. He seemed satisfied with my explanation. I hope you, too, will understand.

Folksingers have used various guitars. I began on WNYC with a four-string tenor guitar, used a six-string pawnshop monstrosity on WNEW, abused a lovely old guitar on NBC and today enjoy the sounds from a twelve-string one-hundred-year-old Sicilian guitar. But until I prevailed upon Goya to help me design a six-string "Folksong" guitar, I wasn't quite satisfied.

Many singers try nylon strings and steel strings, so that the first requirement was for a guitar which could accommodate both types. This was accomplished by using a reinforced pin bridge. Of course, steel strings require a stronger sounding box, and so Goya took their regular classic model and added some extra supports without affecting the resonance or tone.

The classic guitar has a two-inch neck. It was just a little too wide for folk-guitarists. The steel guitar, with its 1½ inch neck was much too narrow. We decided, after much experimentation, to shave the neck down to 1½" at the nut. This seems like hairsplitting or woodshaving, but it means that folk-singers will be happy with the slight difference and that classic-guitarists can easily use the new instrument. The end pin, missing on a true classic guitar which is normally played in a seated position, was put back in the folk model to allow the use of a regular guitar cord or strap for stand-up performance.

We also decided that there would be fret marks on the top of the fingerboard as in the steel-string guitars. The classic-guitarist could easily ignore these if he felt it made guitar-playing too easy. The headpiece could have been the classic-slotted model with the large bone or wood spindle, but these offer no special advantage in folk guitars and make it difficult to use metal strings. And so we decided to use the steel-string type of mechanism that can handle both nylon and metal strings.

Because many of the folk-guitarists use picks or imitation fingernails and scrape them all over the guitar face, we decided to add protective plastic top guards on each side of the sound hole.

My final requirement was that the price be low enough to enable beginners to own a guitar of this caliber. That was the real reason for my trip to Sweden, because the Goya workshops are run by very understanding artisans. As I pointed out at the beginning of these remarks, they seem to understand.

Oscar Brand

THE *Goya* FOLK GUITARS

The newest from Goya, a specially conceived and designed line of guitars specifically for the folk singer. Many months of research and development under the supervision of folk authority Oscar Brand resulted in a guitar uniquely suitable for self accompaniment in folk singing. Basically classic in shape and construction the Goya folk guitars incorporate all the features requested by the professional folk singer. Available in three sizes, to satisfy every requirement, the Goya folk guitars are a superb addition to the world famous Goya line.

This excellent instruction book starts the beginner off on the correct basic principles and carries him on by means of carefully graded exercises and melodies.

Goya

FLAT TOP SPANISH GUITARS

In every age and in every endeavor, there is ultimately created a single monument of achievement against which all other efforts are measured. In time, the classic beauty of the GOYA is sure to be reflected in the design of other fine guitars.

More time is devoted to the exterior finish of the GOYA than to the entire assembly of the ordinary fine guitar. We point this out only to demonstrate the care that characterizes the crafting of this most luxurious of musical instruments.

Perhaps — by simply assuming that the fine guitar you judged best, one, two, or even ten years ago still rates top choice — you've been depriving yourself of a great deal of pleasure.

Here in all its triumphant beauty and tone is America's new fine guitar leader — acknowledged throughout the nation, deeply recognized by the industry itself. The GOYA is a superb forerunner of what others may have . . . later.

All GOYA Steel String Guitars are now fitted with a new patented, built-in adjusting Rod. This Steel Rod runs from Head to Heel and has three special functions briefly described as follows:

1. It provides a counter-tension to the pull of the Strings.
2. It enables the player to adjust the Neck if this, due to climatic variations, should prove necessary.
3. It secures the Neck to the Body of the Instrument while facilitating removal of the Neck if necessary for repair purpose.

In the base of the Heel a shorter Rod gives extra strength to the Heel-Body connection. This assembly must not be interfered with by the player at any time, but only by the repairer when removal of the Neck becomes desirable.

The adjusting Nut for use by the owner is located under the Head Piece Plate.

This new Triple-Function-Rod now further enhances the pre-eminent world reputation of the GOYA Guitars for Craftsmanship, Beauty, Tone and Durability.

Goya

MODEL M-50
Goliath Size

Back and sides of beautiful natural color flame maple and top of finest selected Alp spruce. Intricate inlaying with mosaic around sound hole.
