

# Goya

## THE SOUND OF WOOD

The origin of the Goya guitar dates back several hundred years—within the majestic trees producing the precious woods for today's Goya.

To craft a truly fine guitar, pure hard precious woods are a must. Like a fine violin, only solid woods will produce a great guitar.

Goya tops are made of light, close grain Spruce—found only on the northern slopes of the European Alps. Other hand selected hard woods, including birch, mahogany, flamed maple and rosewood are used to make the many models available from Goya.

All of these flawless woods are blended in perfect harmony to give you a single masterpiece of guitar excellence.
